

Wye Valley Woodland

What the project achieved

The project was successful in carrying out a number of activities including: -

- Veteran Tree Assessments – a consultant carried out a survey on a number of designated areas which identified and recorded 130 veteran trees within these sites. The records have been shared with The Ancient Tree Hunt, Wye Valley AONB and SeWBRec.
- Deer Monitoring – The Deer Initiative (DI) has undertaken a survey on the project sites, undertaking initial deer impact assessments, which will inform and direct them to coordinate ongoing deer control across the project woodlands.
- Woodland Owner Training Courses – A number of workshops were coordinated and delivered during this project including Charcoal Making, Veteran tree training and a number of Woodland workshops, overall a total of 78 people attended these training courses.
- Landowner advice – Approx. 10 woodland owners whose woodlands are within a 2km distance of the River Wye have had their woodland visited, surveyed and reports have been written to provide best woodland management principles.
- Guided Events - 4 guided walks were organised.

RDP amount: £7,491

Match Funding: £7,797 NRW

Total project cost: £15,288
